

# Dдboloskov

Also known as Alexandre David.

# DESIGNER

# WELCOME

Based in Paris, I am passionate about Entrepreneurship, **Design** and Bitcoin.

My unconventional journey has taken me across the globe, allowing me to connect with today's most influential individuals.

Beyond work, I continue to be an andragogue who enjoys imparting my passions and knowledge.

### Capsule

Capsule is a decentralized social media solution where each user hosts their own microservice. These lightweight, user friendly and secure microservices then connect to one another in a mesh design, allowing users to follow one another and share their posts.

## Gamification of streaming music

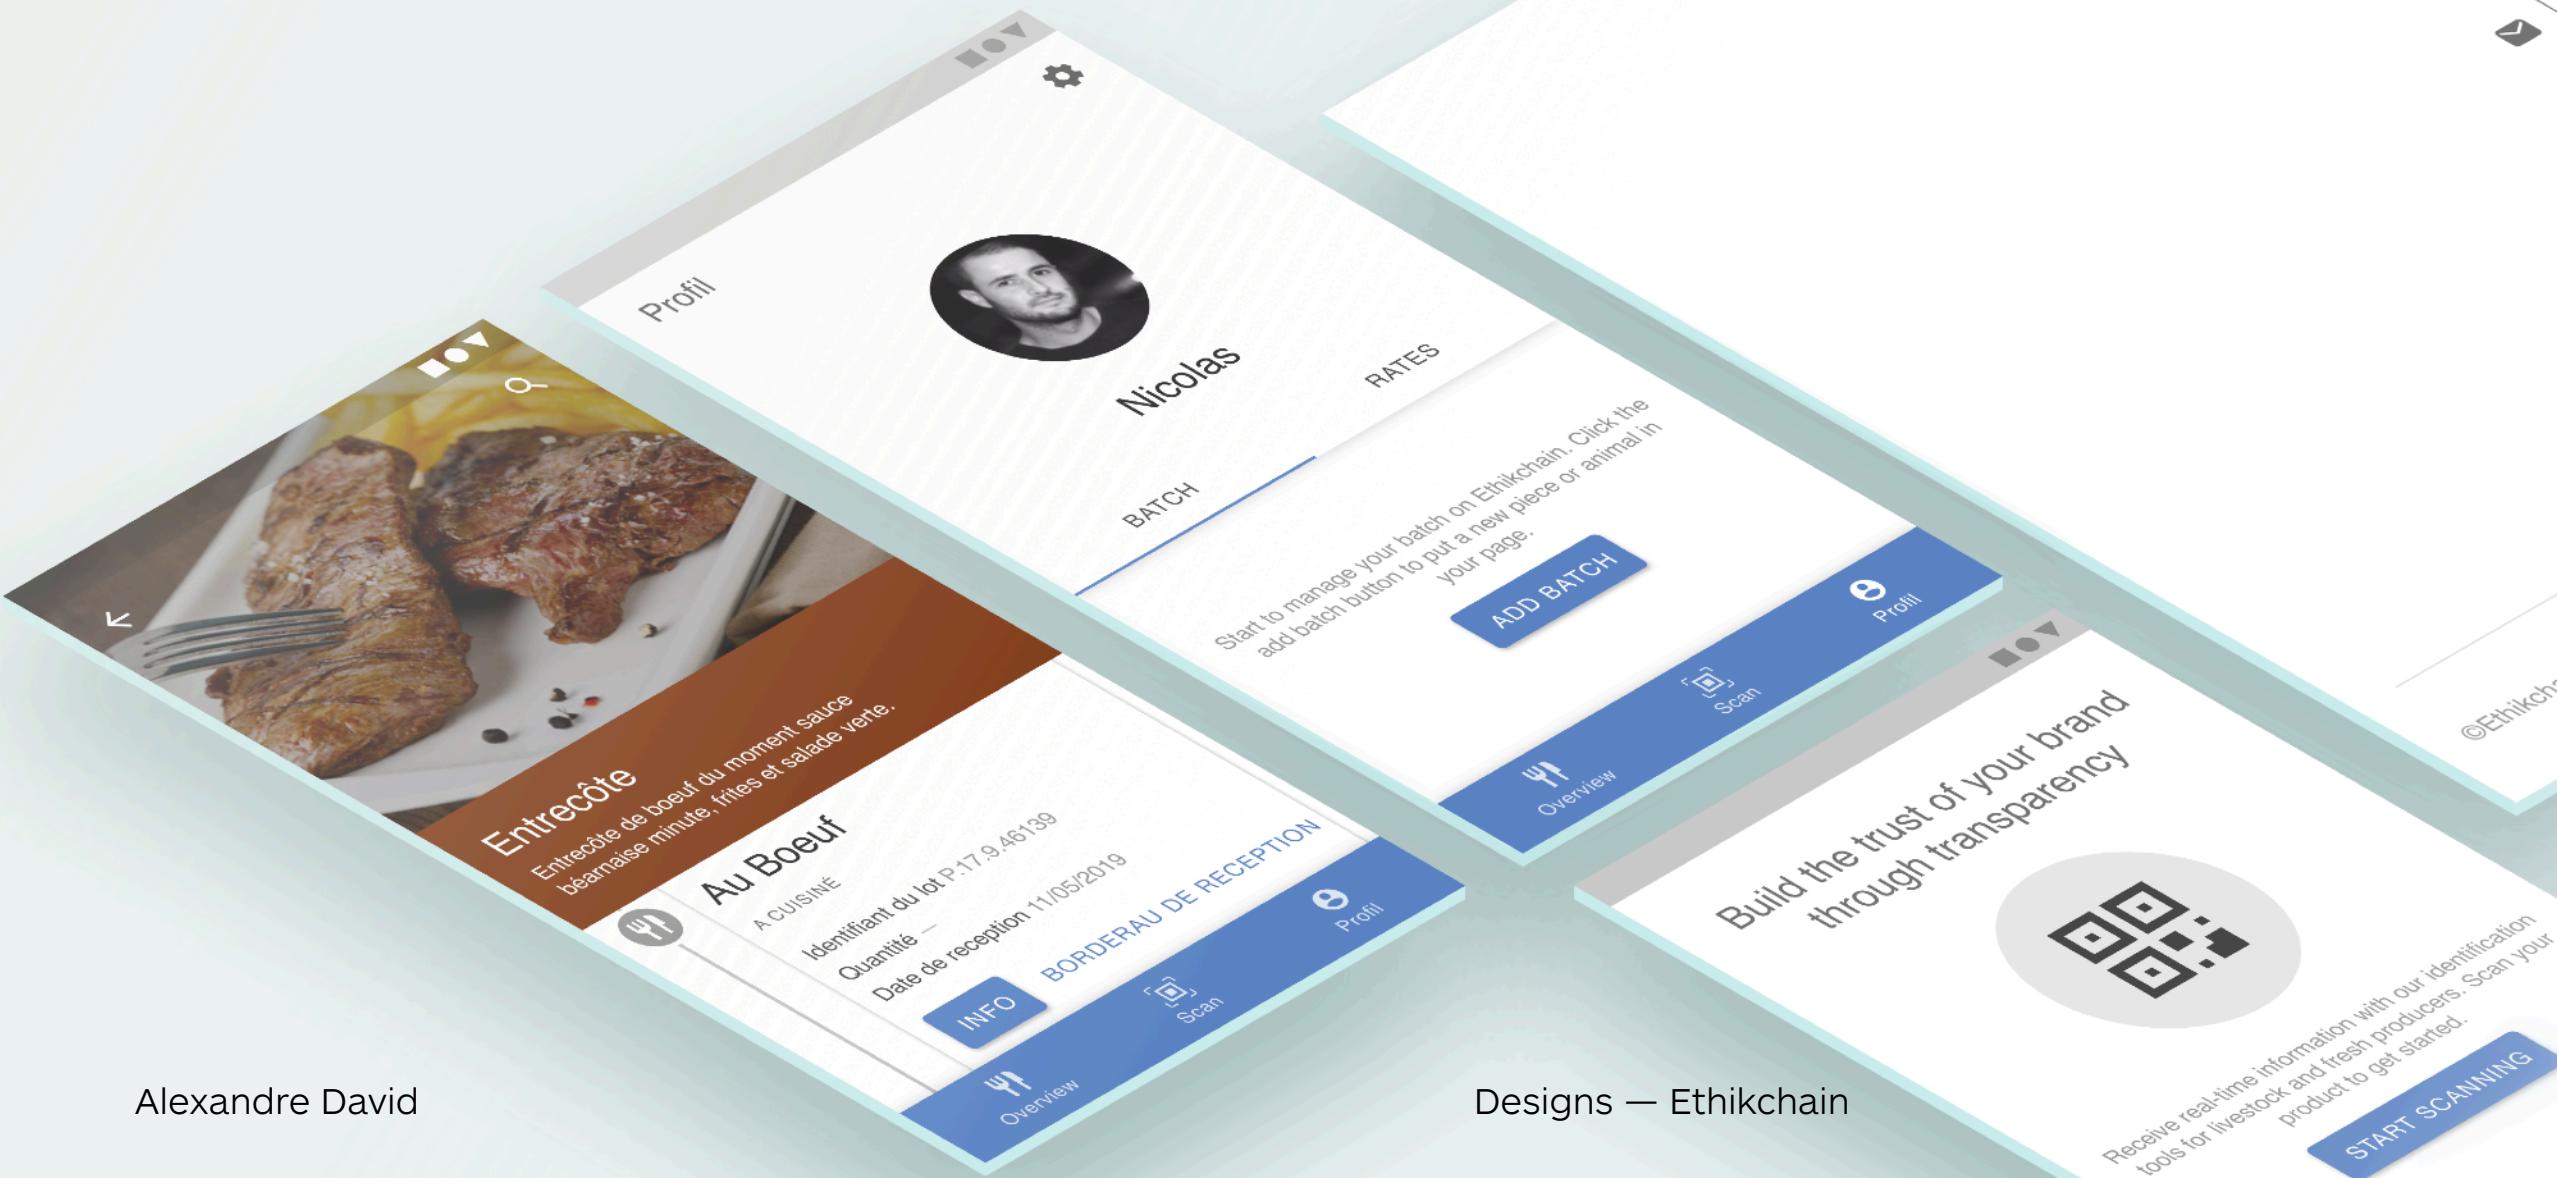

#concept  
#logo design  
#user interface

The image shows a composite view of the Soonvibes platform. On the left, a large screenshot displays the artist profile for David Guetta. The interface includes a sidebar with navigation links like Home, Trending, New Releases, Recommandations, Curators, Browse, COLLECTION (History, Songs, Album, Artists), and PLAYLISTS (New Playlist). The main content area shows David Guetta's bio, top albums (One More Love, Guetta Blaster, Pop Life, One Love, One More Love), and a related artists section featuring Calvin Harris, Avicii, Afrojack, and LMFAO. At the bottom, there's a player bar for 'Dangerous — David Guetta' with volume controls and a comment section. On the right, a smaller screenshot shows a user dashboard with sections for Features, Stats, Help, Download, and a purple box for Economics incentives. A large, semi-transparent portrait of a man's face is visible on the far right.

# ABOUT

# Who am I?

Upon graduating from the Fonderie de l'Image Campus in Paris in 2008, I secured a position as an [Environmental Designer](#) at Arkane Studios.

Since becoming a freelancer in [2010](#), I have concurrently fostered a keen interest in [Bitcoin](#).

In 2014, I established Eureka, my own company, with the aim of uniting my passions for design and technology.

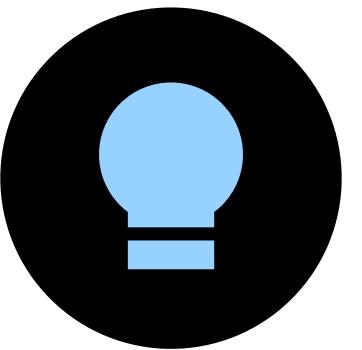

Today, I'm enthusiastic about becoming a part of an exhilarating team and contributing my share to creating a more better world.

# Avocations

## Design

Being a designer with a **background in development** allows me to handle the graphic aspects of a project while also comprehending and contributing to the technical facets.

## Entrepreneurship

An entrepreneur at heart, I relish discovering and acquiring new knowledge, continually pushing my **boundaries to new horizons**.

## Bitcoin

As a *Game Theory* enthusiast, I revel in conceptualizing innovative new business models through the use of digital assets.
